D Surg Gen	Sir, I agree with your draft. 1. I have discussed this with Col Lilley. The only issue that he thought might be of some medical significance is the promiscuity of homosexuals. He states, quite correctly, that many (? most) cases of syphilis are in fact related to homosexual activity. I feel that this is covered by the final sentence of para 2 2. He agrees with all other aspects of your draft. 1 Sep 82
