CHARTER TASK FORCE
EVALUATION OF COSTS

Refs: A. 1745-42-1 (Chart 1F) 4 Jun 86
B. Telecon McLellan/Smith 12 Jun 86

1. Your request for financial data to provide four sets of accommodation has been reviewed. As indicated at ref B it is not possible to quantify the costs associated with the potential requirement for four sets of quarters, including where applicable, common washroom facilities. It is anticipated that at any given site costs to modify common washrooms to serve up to four different groups of personnel would be relatively small and could be funded from the command/base minor new construction allocations. This statement is based on our experience in modifying formerly all male quarters to accommodate females.
2. Should the requirement to provide four sets of accommodation generate a need for bed spaces to be added to the existing inventory, a planning figure of \$30,000 per bed space should be used.
3. It is appreciated that we have not really answered your question. However, to obtain an estimate with any degree of confidence would require a survey of each and every quarters building on each and every base and station. As discussed at ref B, such expenditure of staff time is not considered warranted at this time.
